I am a motivated and ambitious individual hailing from Agartala, Tripura. My educational journey began at Sri Krishna Mission School, where I completed my 10th and 12th-grade studies under the CBSE board, with a focus on the science branch. Fueling my passion for technology, I ventured to Bengaluru, Karnataka, and enrolled at Jyothy Institute of Technology to pursue a Bachelor's degree in Computer Science and Engineering, where I am currently studying.

Being multilingual is one of my strengths, as I am fluent in Hindi, Bengali, and English, with a basic understanding of Kannada. These language skills have enabled me to effectively communicate and collaborate with diverse groups of people.

Throughout my academic journey, I have developed a strong foundation in programming languages such as C, Java, and gained practical experience in Android Studio application development. Additionally, I have delved into web development technologies like HTML, CSS, and JavaScript, broadening my skill set in the digital domain.

As a proactive learner, I continually seek opportunities to expand my knowledge and stay updated with the latest advancements in the field of computer science.

In conclusion, my background in Tripura, coupled with my education in Bengaluru, has provided me with a strong academic foundation and a diverse cultural perspective. I am eager to leverage my skills, language proficiency, and passion for technology to embark on a fulfilling and rewarding career in the world of computer science and engineering.

Skills

- Multitasking Abilities
- Android development
- Programming
- C/C++ programming
- Java
- HTML, CSS, JavaScript
- SQL
- Debugging errors

Work History
